EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR

1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Carol Einaudi on March 23, 2004.

On line 13 of claim 28, the phrase "in a first reaction phase" was deleted. On line 15 of claim 28, the phrase "in the first reaction phase" was deleted and replaced by the phrase --in B in a second aggregation measurement,--.

On line 2 of claim 40, the phrase "the reaction mixture" was changed to --any reaction mixture--.

On line 13 of claim 51, the phrase "in a first reaction phase" was deleted. On line 15 of claim 51, the phrase "in the first reaction phase" was deleted and replaced by the phrase --in B in a second aggregation measurement,--.

On line 2 of claim 60, the phrase "the reaction mixture" was changed to --any reaction mixture--.

2. The following is an examiner's statement of reasons for allowance: Application serial no. 09/809,062 is being allowed since none of the prior art of record teaches or fairly suggests a method of measuring the macroaggregation of blood platelets, wherein the specification defines the macroaggregation of platelets as the formation of large aggregates of platelets that are larger

Art Unit: 1743

than the typical aggregation of platelets, which comprises the steps of obtaining a sample containing blood platelets, adding at least one activator that induces platelet aggregation to the sample to form a mixture, mixing the mixture in a first reaction phase for a time sufficient to induce the formation of macroaggregates, mixing the mixture less vigorously or not at all in a second reaction phase and measuring the macroaggregation of the blood platelets. The closest prior art teaches of measuring the microaggregation of platelets in an unstirred blood sample after an initial stirring phase, but not the macroaggregation of platelets as defined in the instant specification.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
